

I inform you of my desire to terminate my annual mooring contract mentioned in reference of which the deadline is the 31st of December of the current year.

In accordance with the provisions in the contractual agreement,

In case of an early termination (during the calendar year) decided by the customer and whatever the reason, the payment is due up until the date signed upon in the termination form (if the boat is no longer there) or until the boat leaves on which is added a waiting period (annual amount/12*2).

In case of termination between the 31st of October and the 31st of December of the current year, the contract assumedly renewed for the following year, the early termination is applicable.

In case of termination on due date (end of calendar year), your boat will have to be remove, the latest being the 31st of December of the current year. You have 2 months must inform the notice and marina office the latest 31st of October.

Furthermore, the right of mooring, subject of the contract, cannot be incidentally bequeathed at the ownership of the boat in profit of a new one. However, if the latter is moored in the marina, it will have to be subject to the current stopover rates.

Finally, I must give back the access badges given to me, otherwise, I will be charged 15€ per badge.
